SYED MUHAMMAD ALI

+92 332 584 7765 | **Email**: mohammadalisyed37@gmail.com | **LinkedIn:** m-ali-data | Karachi, Pakistan

SUMMARY

Junior Data Analyst with hands-on experience in SQL, PostgreSQL, Python, Excel, and Power BI. Skilled in data cleaning, ETL, dimensional modeling, business intelligence, and dashboard development. Passionate about transforming data into actionable insights and building data-driven solutions while expanding expertise in AI and Machine Learning.

EDUCATION

PAF-KIET 2024 – 2028 (Expected)

BSC Computer Science *CGPA: 3.5/4.0*

TECHNICAL SKILLS

Data Analytics: SQL, Python, Excel, Power BI, DAX

Data Processing: Pandas, NumPy

Visualization: Power BI, Matplotlib, Seaborn

Databases: PostgreSQL, SQL Server

Tools: Jupyter Notebook, Git, GitHub, VS Code

Machine Learning: Scikit-Learn, Keras, NLP

EXPERIENCE

PapaCambridge June 2024 – December 2025

Data Analyst Karachi, Pakistan

Data Cleaning, Data Analysis, Excel, Reporting, Data Visualization, Problem Solving, Attention to Detail

- Collected, cleaned, and validated datasets from multiple sources to ensure accuracy and consistency for analysis.
- Analyzed data trends and patterns to support decision-making and operational improvements.
- Generated reports and dashboards to present insights clearly to stakeholders.
- Performed data quality checks and resolved inconsistencies to maintain reliable datasets.

PROJECTS

Inventory Sales & Purchasing Analytics Dashboard | Excel, PostgreSQL, Power BI

- Built an end-to-end business intelligence solution by cleaning retail inventory datasets and designing a PostgreSQL **Star Schema** data warehouse (Fact & Dimension tables).
- Performed EDA, advanced SQL analytics, window functions, CTEs, statistical analysis, KPI reporting, and created SQL views for reusable reporting.
- Designed interactive Executive, Sales, and Purchasing dashboards in Power BI featuring DAX measures, drill-through, slicers, and dynamic visualizations.
- Analyzed revenue, purchasing spend, vendor performance, store performance, product segmentation, and sales trends to generate actionable business insights.
- Applied dimensional modeling and business reporting techniques to transform raw transactional data into decision-ready dashboards.

Movie Data Analysis Project | *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Analyzed movie dataset using Python (Pandas, NumPy) to clean data, handling missing values, features engineering, and study financial performance.
- Built visualizations and correlation analysis (Matplotlib, Seaborn) to identify key drivers of gross earnings, with budget and votes showing the strongest impact.

ACHIEVEMENTS/CERTIFICATIONS

- **Certified Data Analyst** - **YouExcel**
- **Google Machine Learning Crash Course (Linear Regression)**: Google Developers Badge
- **Google Machine Learning Crash Course (Binary Classification)**: Google Developers Badge
- **Full-Stack Generative & Agentic AI Training**: Udemy **Certificate**
